## FLEX-press

WHITE MATERIAL; TOP-SURFACE PAINT

Revolutionary new technology, combined with a soft-strata substrate, enables a fully-flexible ADA wall sign for dramatically curved wall spaces or regulated environments where rigid sign material is detrimental.

Correctional institutions and behavioral health centers can eliminate perilous, rigid sign material in carceral spaces by utilizing FLEX-press thereby ensuring a safe environment for all while still being code compliant.

*Recommended Use: Institutional environments, Healthcare facilities, Schools and Correctional Facilities*
