MONOLINE

Effective wayfinding is about the message, not the vessel. MONOLINE is an extruded aluminum bracket, which securely holds graphic panels with only a 12mm (0.47 in) or 25mm (0.98 in) bracket face exposed.

MONOLINE standard specification for a graphic panel includes a sheet of digitally printed paper, held between a sheet of toughened safety glass, and a backing panel of aluminum laminate. Using digitally printed paper significantly reduces the cost of sign up-keep in frequently changing environments.

MONOLINE glass front panels have a proprietary anti-reflective finish, which neutralizes reflection from ambient light sources, but allows the graphic content to be read crisp and clearly. The finish can also be applied to optically clear 'low iron' glass if required.

Brackets can be manufactured in a variety of different lengths, to fit standard paper sizes up to A1 and non-standard sizes can be made upon request. Most signs will require a bracket at both the top and bottom, but signs A5 or smaller require only a bracket at the bottom. MONOLINE brackets come standard in silver anodized aluminum and can be painted to match other colors upon request.

*Insert sizes vary. Standard sizes available, custom sizes available upon request.

SOLUTIONS

MONOLINE is perfect for wayfinding signage throughout a college campus, corporate campus, museum, or library. Place MONOLINE near elevators, outside of monuments, or use as a directory outside of shared office spaces.

MONOLINE is the perfect design for;

- Hospitals
- Universities
- Corporate buildings
- Libraries
- There are endless possibilities

SYSTEM	PRODUCT	BRACKET SIZE	PANEL SIZE
		h x w x d	h x w x d
MONOLINE	<i>Imperial</i>
