VERTICO

 $Vertico's\ frameless\ design\ allows\ an\ edge-to-edge\ glass\ face\ with\ a\ 0.4\ in.\ clear\ glass\ margin\ around\ the\ perimeter.$

As a safety measure, the glass face has radius corners. Vertico has an elegant, fluted side casing that holds the sliding mechanism. Vertico has no visible fixings. Vertico also uses a unique and proprietary sliding mechanism to open and close. This allows posters and notices to be displayed or changed safely in busy circulation spaces.

Vertico can be illuminated using LED 'maintenance free' technology. LED lamps should last many times longer than conventional uorescent lamps. LEDs have a running cost of around 20% of conventional lamps.

Vertico is suitable for all internal environments where temporary signs need to be displayed; corporate reception areas, conference centers, hotel lobbies, restaurants, showrooms, museums and galleries, schools, universities and libraries and retail environments.
